

MEDICAL FEE DISPUTE RESOLUTION FINDINGS AND DECISION

GENERAL INFORMATION

Requestor Name

Texas Health Fort Worth

MFDR Tracking Number

M4-15-0656-01

MFDR Date Received

October 17, 2014

Respondent Name

Texas Mutual Insurance

Carrier's Austin Representative

Box Number 54

REQUESTOR'S POSITION SUMMARY

Requestor's Position Summary: "...the date of service is after 3/01/08 thus the claim should be paid according to §134.403(f)(1)(A&B) of the newly revised Texas Fee Schedule."

Amount in Dispute: \$2,230.64

RESPONDENT'S POSITION SUMMARY

<u>Respondent's Position Summary</u>: "Although 11042 was billed with the -59 modifier that is not applicable in this instance as the packaging policy is not a function of the NCCI Edit but of the Integrated Code Editor for OPPS and non-OPPS hospitals."

Response Submitted by: Texas Mutual

SUMMARY OF FINDINGS

Date(s) of Service	Disputed Services	Amount In Dispute	Amount Due
April 29, 2014	Outpatient Hospital Services	\$2,230.64	\$0.00

FINDINGS AND DECISION

This medical fee dispute is decided pursuant to Texas Labor Code §413.031 and all applicable, adopted rules of the Texas Department of Insurance, Division of Workers' Compensation.

Background

- 1. 28 Texas Administrative Code §133.307 sets out the procedures for resolving medical fee disputes.
- 2. 28 Texas Administrative Code §134.403 sets out the fee guidelines for outpatient acute care hospital services.
- 3. The services in dispute were reduced/denied by the respondent with the following reason codes:
 - 97 The benefit for this service is included in the payment/allowance for another service/procedure that has already been adjudicated
 - 616 This code has a status Q APC indicator and is packaged into other APC codes that have been identified by CMS.
 - 193 Original payment decision is being maintained

Issues

- 1. What is the applicable rule for determining reimbursement for the disputed services?
- 2. What is the recommended payment amount for the services in dispute?
- 3. Is the requestor entitled to reimbursement?

Findings

- 1. This dispute relates to facility services performed in an outpatient hospital setting with reimbursement subject to the provisions of 28 Texas Administrative Code §134.403, which requires that the reimbursement calculation used for establishing the maximum allowable reimbursement (MAR) shall be the Medicare facility specific amount, including outlier payment amounts, determined by applying the most recently adopted and effective Medicare Outpatient Prospective Payment System (OPPS) reimbursement formula and factors as published annually in the Federal Register with the application of minimal modifications as set forth in the rule. Per §134.403(f)(1), the sum of the Medicare facility specific reimbursement amount and any applicable outlier payment amount shall be multiplied by 200 percent, unless a facility or surgical implant provider requests separate reimbursement of implantables. Review of the submitted documentation finds that separate reimbursement for implantables is not applicable.
- 2. Under the Medicare Outpatient Prospective Payment System (OPPS), each billed service is assigned an Ambulatory Payment Classification (APC) based on the procedure code used, the supporting documentation and the other services that appear on the bill. A payment rate is established for each APC. Depending on the services provided, hospitals may be paid for more than one APC per encounter. Payment for ancillary and supportive items and services, including services that are billed without procedure codes, is packaged into payment for the primary service. A full list of APCs is published quarterly in the OPPS final rules which are publicly available through the Centers for Medicare and Medicaid Services (CMS) website. Reimbursement for the disputed services is calculated as follows:
 - Procedure code J7060 has a status indicator of N, which denotes packaged items and services with no separate APC payment; payment is packaged into the reimbursement for other services, including outliers.
 - Procedure code J7120 has a status indicator of N, which denotes packaged items and services with no separate APC payment; payment is packaged into the reimbursement for other services, including outliers.
 - Procedure code 20670 has a status indicator of Q2, which denotes T-packaged codes; payment for these services is packaged into the payment for any other procedures with status indicator T that are billed for the same date of service. This code may be separately payable only if no other such procedures are billed for the same date. Review of the submitted information finds that OPPS criteria for separate payment have not been met. Payment for this service is included in the payment for procedure code 11042 billed on the same claim. The use of a modifier is not appropriate. Separate payment is not recommended.
 - Procedure code 11042 has a status indicator of T, which denotes a significant procedure subject to multipleprocedure discounting. The highest paying status T procedure is paid at 100%; all others are paid at 50%. This procedure is paid at 100%. These services are classified under APC 0016, which, per OPPS Addendum A, has a payment rate of \$274.81. This amount multiplied by 60% yields an unadjusted laborrelated amount of \$164.89. This amount multiplied by the annual wage index for this facility of 0.9549 yields an adjusted labor-related amount of \$157.45. The non-labor related portion is 40% of the APC rate or \$109.92. The sum of the labor and non-labor related amounts is \$267.37. Per Medicare Claims Processing Manual, CMS Publication 100-04, Chapter 4, §10.7.1, if a claim has more than one surgical service line with a status indicator of S or T and any of those lines has a charge of less than \$1.01, then the charges for all S and T lines are summed and the charges are divided across those lines in proportion to their APC payment rate. The new charge amount is used in place of the submitted charge amount in the line-item outlier calculation. This claim has a status indicator S or T line item with a billed charge less than \$1.01; therefore. all S and T line charges are reallocated accordingly. The APC payment for this service of \$267.37 divided by the sum of all S and T APC payments of \$267.37 gives an APC payment ratio for this line of 1, multiplied by the sum of all S and T line charges of \$0.00, yields a new charge amount of \$0.00 for the purpose of outlier calculation. The cost of these services does not exceed the annual fixed-dollar threshold of \$2,900. The outlier payment amount is \$0. The total Medicare facility specific reimbursement amount for this line is \$267.37. This amount multiplied by 200% yields a MAR of \$534.74.
 - Procedure code J2250 has a status indicator of N, which denotes packaged items and services with no separate APC payment; payment is packaged into the reimbursement for other services, including outliers.
 - Procedure code J3010 has a status indicator of N, which denotes packaged items and services with no separate APC payment; payment is packaged into the reimbursement for other services, including outliers.
- 3. The total allowable reimbursement for the services in dispute is \$534.74. This amount less the amount previously paid by the insurance carrier of \$534.75 leaves an amount due to the requestor of \$0.00. No

additional reimbursement can be recommended.

Conclusion

For the reasons stated above, the Division finds that the requestor has not established that additional reimbursement is due. As a result, the amount ordered is \$0.00.

ORDER

Based upon the documentation submitted by the parties and in accordance with the provisions of Texas Labor Code §413.031, the Division has determined that the requestor is entitled to \$0.00 reimbursement for the disputed services.
